

Mutually Exclusive Events

$A, B \Rightarrow \text{Events}$

$$P(A \cap B) = 0$$

Example

1) When a coin is tossed and prob of getting head or tail at a same time is zero

2) Prob of car taking a turn left or right at same time.

$$P(A|B) = \frac{P(A \cap B) = 0}{P(B)}$$

$$\therefore P(A|B) = 0$$
